TOOL MANAGEMENT SYSTEM (TMS)

PRIME QUALITY | PRIME SERVICE | PRIME RENTALS

INTRODUCING PRIME RENTALS TOOL MANAGEMENT SYSTEM

DO YOU WANT TO MAXIMISE OPERATIONAL EFFICIENCY AND MINIMIZE COST DURING YOUR NEXT SHUTDOWN?

Prime Rentals have the solution – Prime TMS provides a secure and simple system that controls the movement of tools, equipment, PPE, and consumables for on-site outages across all industry sectors.

TMS improves productivity by eliminating the need to search for equipment on-site at anytime by offering a controlled and managed environment. When checking codes of tooling and equipment, the scanner automatically confirms the status of equipment on hire, tracks the user and reports stock quantities for the complete outage period.

We understand that managing tooling during an outage needs to be simple, Prime TMS uses an innovative voice activated bar-coding system to accurately assign tools to specific personnel.

HOW WILL PRIME'S TMS BENEFIT YOUR BUSINESS?

- Minimise downtime & increase productivity
- Substantial cost savings. Fixed cost = no blowouts
- Total equipment & tool management
- Full visibility = Minimal stock losses
- Focus on safety and compliance
- We bring our expertise to you!

PARTNERING WITH PRIME RENTALS

Prime Tool Management System is a specialised service operating within Prime Rentals. With years of experience working in major construction, shutdown projects and various sized outages, Prime Rentals have the knowledge to provide tailored solutions to suit the requirements of your next project. We offer valuable support in streamlining your project and providing quick tooling analysis.

We are committed to the development and supply of specialised containers, provisioned with site and project specific equipment; to track the usage, out of service, damaged and loss of equipment, during and post these projects.

Sick of being told all or most of the equipment used for the last outage is missing - and can't be recovered? Then you need the Prime Tool Management System.

KEY FEATURES AND BENEFITS

PRE-PLANNING & PARTNERING THROUGH THE JOB

We use our experience and work with you from start to finish to develop a tailored solution to suit the requirements of your next project. We offer valuable support in developing a streamlined strategy for effective equipment management.

SITE SETUP

Purpose-built tool store will be setup on your project site. The style, size, tools and equipment will be pre-determined based on the pre-planning and project scope of work.

SPECIALIST TOOLING, EQUIPMENT & SUPPORT

In addition to the wide variety of hire equipment available, we can provide your project with specialist tooling and equipment. Specialist equipment comes with the added support of our Prime experts who can assist in selection, training and other information.

PROVIDES TRACEABILITY & ACCOUNTABILITY OF ALL EQUIPMENT & TOOLING

When checking codes of tooling and equipment, the scanner automatically confirms the status of equipment on hire, tracks the user and reports stock quantities for the complete outage period.

VOICE ACTIVATED TO SPEED UP PROCESSING

We understand that managing tooling during an outage needs to be simple, Prime TMS uses an innovative voice activated bar-coding system to accurately assign tools to specific personnel.

DETAILED REPORTING

Reporting allows the client to know exactly where they are at any time and greatly assists close out productivity. A host of reports are available and can be run daily, weekly or on completion of the project. These reports provide detailed information to enable effective management throughout the project and we can customise a report to suit the individual clients requirements.

HOW IT WORKS

While our experience adds great value to your project planning it's our tried and tested tool management system that really sets us apart.

The Prime Tool Management System (TMS) is a system developed over years of experience, knowledge, trialing and improvements to offer our clients the best in equipment and tooling management.

Prime TMS has been designed to relieve the logistical headache associated with equipment and tool tracking during a shutdown or outage.

The largest hurdle with shutdown management is the expectation of reduced productivity combined with an unknown amount of variations and consumable blowouts. The Prime TMS effectively tracks tooling and equipment using a voice activated barcoding system. Knowing who and in which area the item is at increases utilisation and reduces the amount of tooling required. By assigning accountability to the user productivity is increased and missing, lost or stolen items are reduced significantly, consequently saving time and money.

WHAT YOU GET

A large 20' container is fitted with shelving, storage bins, lighting and power fittings plus a list of tooling to suit your requirements, fully bar-coded for ease of tracking, stocktaking and maintenance control. Complete manifest provided in hard & soft copy format.

We offer both manned and unmanned options. If you decide your project requires a manned option we will provide an experienced store person who will issue and manage your tooling requirements.

Our Tool Management System (TMS) can issue identity cards to all potential users, allocate equipment to all users and track and monitor the location of this equipment throughout the course of the shutdown.

TMS reports can be issued to all foreman or supervisors during the course of the project and more especially one week out from project completion. This will track all equipment to minimise loss, saving valuable time at project end tracking equipment before all maintenance staff leave site.

PROJECTS

OTHER TOOL MANAGEMENT PROJECTS

- Tarong Power Station- Shutdown Maintenance
- Stanwell Power Station- Shutdown Maintenance
- Norwich Park Mine - CHPP Shutdown Maintenance
- German Creek Mine - CHPP Shutdown Maintenance
- Blair Athol Mine - Feed Breaker Overhaul
- Dalrymple Bay - Maintenance and Corrosion Treatment
- Yarwun Site - Shutdown Maintenance
- BMA Blackwater - Shutdown Maintenance
- CSR Proserpine Sugar Mill - Upgrade
- UGL Resources (Various Mine maintenance projects)
- Monadelphous (Various Mine maintenance projects)
- Wesfarmers Curragh - (Various Mine maintenance projects)
- Oaky Creek Mine - Shutdown Maintenance

PRIME CONSULTANCY

To ensure we provide you the best solution, it is important we have a clear understanding of the scope of works, the length of the project and the operational team charged with the responsibility of managing the outage or shutdown.

To gain this understanding and depending on the type and style of your requirement, we may require detailed information to help fine tune a cost effective solution, to suit both parties.

Below is a small sample of some details to consider when organising your next outage;

DETAILED LIST OF EQUIPMENT

- Quantities of each equipment type
- Sizes of each equipment type

ESTABLISHING STAFFING LEVELS

- Fatigue management
- Site Induction (Coal board medical etc.)
- Shift changeover procedure
- Accommodation
- PPE specifics
- Tickets / permit requirements

LENGTH OF HIRE TERM

- Delivery date – prior to shut
- Agreed completion date

INVOICING DETAILS

- As a shutdown kit or as individual items noted on the invoice

AUTHORISATION LEVELS

- Who is allowed to order equipment

PURCHASE ORDER PROCEDURES

- Who issues these?

CURRENT SITE REQUIREMENTS

- Vehicle requirements
- Security (Compound – access to ablution – other facilities)
- Power Supply – Internet availability
- Site Location – Access
- Site specific requirements for individual items (hose tails on pneumatics, sling types, residual current devices etc)
- Electrical test and tag register
- Lifting register- complete with site specific tag colour (may vary from industry regulations)

PLANT AND EQUIPMENT

Prime are considered solution providers and are well equipped to support your mining maintenance and construction activities statewide from our service facilities in Blackwater, Bowen, Brisbane, Gladstone, Mackay, Emerald, Moranbah, Roma and Wandoan. Reliability, regular servicing and on-time delivery are the key guidelines on which to build a solid & long term business relationship.

We have equipment ranging from Site Offices, Crib huts, Ablutions units, all terrain tele-handlers, lighting towers, forklifts, straight stick and knuckle booms, scissor lifts, generators, welders, compressors, compaction gear, industrial equipment and bar coded tool stores with a wide range of specialised tooling.

Prime Rentals offer service facilities at each of the locations listed plus mobile service teams and a select group of specialist contractors to service all equipment in the field, regardless of the location.

Prime has in place a strategic equipment upgrade program, so regular interaction with our client is essential during the planning of fleet selection and equipment quantities.

Some of the other mine specked equipment on hand:

- Shaft alignment lasers
 - Hydraulic Cassettes
 - Hydraulic Nut Splitters
 - Hydraulic Flange Spreaders
 - Torque Multipliers
 - Hydraulic Rams & Pumps
 - Pipe Threading machines 4"
